-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Oath/Declaration

It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either on an application data sheet or supplemental oath or declaration.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15, 17, 19, 21 and 22 are rejected under 35

U.S.C. 102(b) as being anticipated by Martinez, Sr. (US Patent No. 5,841,595).

Martinez sr. discloses a support frame for a thin-film mirror comprising a) a molded, plastic one-piece support housing of predetermined shape (Fig. 1, 12) having a pan surface and a hollow wall of U-shaped cross-section surrounding the pan surface (see Fig. 2), b) the hollow wall having spaced inside and outside wall portions (see Fig. 2), and a film mounting surface portion for thin reflective film joining the spaced inside and outside wall portions, the film mounting surface portion being substantially parallel to the pan surface and

Art Unit: 2872

being stepped away from the pan surface (see 24 in relative to 12). The support frame has a flange that is formed on the outside wall (42) and the hollow wall defines a well and a reinforcing member of a size and a shape corresponding the hollow (see Fig. 4). The hollow wall is in the shape of a four-sided polygon with two acute corner angles (see Fig. 4).

The method of eliminating wrinkling of thin reflective film including steps such as molding, forming securing are met by the disclosure of the prior art.

Allowable Subject Matter

3. Claims 1-14 are allowed.

4. Claims 16, 18, 20 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: claims are allowable at least for the reason that the prior art does not teach or reasonably suggest the fillet that having a fillet top surface formed as a co-planar continuation of the top mounting surface portion of the hollow wall or hollow wall has a trapezoidal periphery as set forth in the claimed combination.
